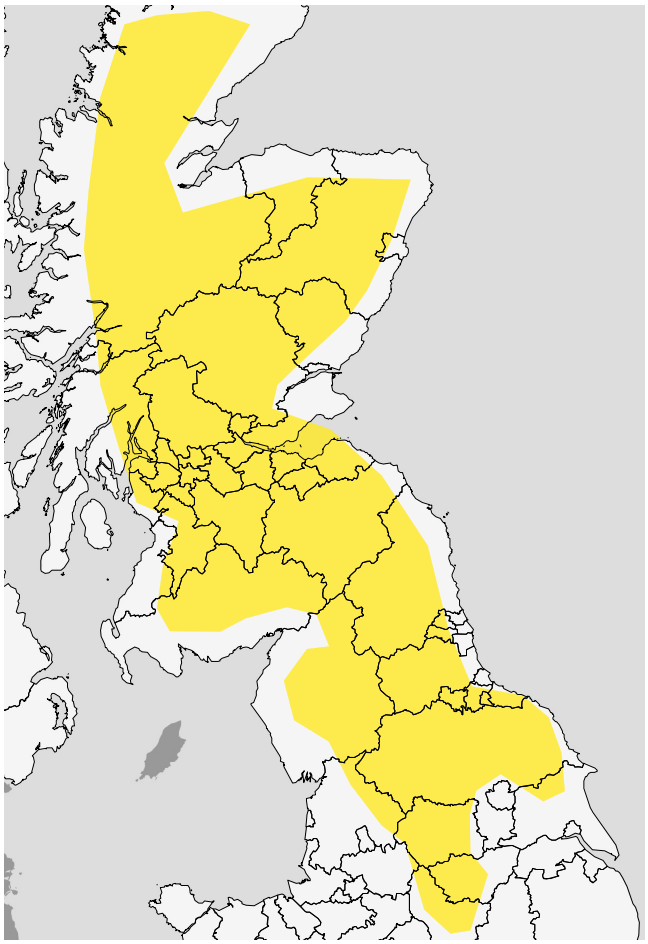
Yellow warning
Snow & Ice

Between
08:00 Wed 13 Jan 2021 and
21:00 Thu 14 Jan 2021



Heavy snow may affect parts of the warning area, with possible significant travel disruption.

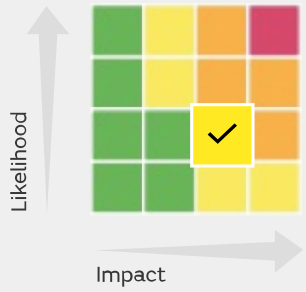
What to expect

- Possible travel delays on roads stranding some vehicles and passengers, especially across higher routes, with potential for road closures.
- Possible delays or cancellations to rail and air travel
- Power cuts may occur and other services, such as mobile phone coverage, may be affected
- Untreated pavements and cycle paths might be dangerous or even impassable, posing a greater risk of injuries and accidents.

Further details

An area of rain pushing north-eastwards is expected to turn snow in places as it encounters colder air across Scotland and parts of northern England.

At first the main hazard may be of rain falling onto frozen surfaces leading to ice, especially on higher level routes. However snow becomes more likely later Wednesday and at least for a time on Thursday. Heavier snowfall is more likely above 100 m in Scotland and above 200 m in England, where 5-10 cm of snow may accumulate, possibly 20 cm on highest routes.



Low likelihood of medium impacts

Issued at 11:33 Mon 11 Jan, 2021 Updated at 11:20 Tue 12 Jan, 2021

Yellow warning
Snow & Ice

Between
08:00 Wed 13 Jan 2021 and
21:00 Thu 14 Jan 2021

Further Details (continued)

At lower levels, 2 - 5 cm of snow may accumulate in places, but the situation remains finely balanced, with the possibility that most lower-lying areas in northern England see rain or sleet rather than snow.

Reason for update

Start time delayed, with greater emphasis on ice at start of warning period. Southern extent of warning area adjusted. Suggested snow amounts reduced slightly.
